

# Hack Club

## What is Hack Club?

Hack Club is a San Francisco based nonprofit that helps high schoolers start after-school coding clubs. We are a worldwide community of learners and believers in the importance of coding education. We provide everything students need to start great clubs.

## What does a Hack Club look like?

Hack Club chapters meet after-school, every week, for an hour and a half. The structure varies club to club, but most Hack Clubs end up looking like a year-long hackathon, where members build projects and share them with one another. Club leaders use our curriculum to teach new members to code while they're working on projects.

## What do you mean by "hacking"?

When we say "hack", we're referring to the "life hack" type of hacking. Simply put, hacking is creative problem solving – and it often includes code. Hack Club teaches students to code and to use coding skills to solve problems, not to crack into your bank account.

## Our Impact

Since its inception in 2014, Hack Club has helped high school students across 82 schools, 16 states, and 7 countries start coding clubs. We have given the power of coding to a combined total of more than 1500 students around the world.
